

POLITICAL PARADE

By CLEM WHITAKER

During the years that California complacently laughed off radicalism as crackpotism—this state was becoming the most dangerous hotbed of Communist and Nazi intrigue in the United States—the leading operating base of Stalinists and Bundists, bent on softening up America for revolution and conquest!

The authority for that double-barreled blast is Assemblyman Jack B. Tenney of Inglewood, champion of labor but arch foe of Communism, and chairman of the legislative committee investigating un-American activities in California.

Mr. Tenney enjoys the undoubted distinction of being more hated by "reds" and revolutionaries than any other man in California, with the possible exception of his good friend, former Assemblyman Sam Yorty of Los Angeles, who preceded him as chairman of the committee. Together they started the sensational expose of Communism in California's relief administration two or three years ago which first turned the spotlight on the "enemies within our gates."

And Mr. Tenney, with a new appropriation from the legislature to continue the work of his committee, is now making ready to finish the job which he and Mr. Yorty began before most of the country realized that California had become a major base of seditious activity. If California hasn't already been jarred out of its complacency, Mr. Tenney's committee, when it starts public hearings will doubtless end the era of easy-going tolerance of revolutionaries and startle even the most cynical.

"Don't blame the rank and file members of labor for acts of sabotage against the national defense program in California," says Mr. Tenney. "The average union man is a good American, who would work any number of hours, or make any sacrifice, to help his country, but we are now reaping the whirlwind of years of indifference when Communists and Nazi agents were allowed to bore from within. The traitors are not confined to labor unions; in some instances, they have gotten into public office—and they must be rooted out if this country is to endure as a free nation."

Mr. and Mrs. Willard Farr and children are leaving soon for a vacation trip including a week at Lake Tahoe and then a visit in Salt Lake City and on to Yellowstone Park. Both Mr. and Mrs. Farr, now living in Salinas were young people in Campbell.

Loren Donald Howie of Leigh avenue, Campbell graduated June 11 from the army air corps advanced flying school at Stockton, received his wings and a commission as second lieutenant in the reserve. He took his basic training course at Moffett Field.

REPORTS HEARD AT MEETING OF LOCAL GRANGE

Members of Orchard City grange heard interesting reports from chairmen of various committees, at Tuesday's meeting. Harry Barnes discussed legislation and in connection with reports of reduced freight rates states that public hearings should be held by the Interstate Commerce Commission before fixing rates.

Grange day at the State Fair this fall has been set for Wednesday. Reports of attendance at the fair showed the grange has had the largest of any organization in past years.

Preparations are under way for participation in the State grange convention in Santa Barbara, when the Santa Clara county drill team will perform.

At a meeting of grange masters a recommendation to the government was made that agriculture be given equal consideration with industry in national defense.

S. N. Hedegard summarized some of the recent taxation measures passed or under consideration by the legislature and Congress. He proposed some humorous solutions to the future of the taxpayers.

Mrs. Lavinia Grattan reported on the need for more mechanical education.

Cultivation of orchards until July was recommended by Mervyn Keesling and for protection of trees from gophers he said that barley with two per cent strychnine spread around them in the early morning was effective.

Red spiders are destroyed by a sulphur dust, but it needs a temperature of about 80 degrees to be effective.

A fair committee was appointed to work with committees from other granges for the Santa Clara county fair.

Dr. Robert McCormack conducted the lecture hour program. A group of young people including his daughter presented Hula dances and an orchestra played Hawaiian numbers.

Lambert Skillman presided over an Hawaiian program presented by the Dutton family of San Jose. Lessor and Daphne Dutton gave dance numbers and Priscilla Dutton sang, accompanied by her parents, Mr. and Mrs. Willis E. Dutton. Dottie May McCormack and Nancy Bartholomew joined the Dutton sisters in two numbers.

J. M. McKinnon who lived for 14 years in the Islands gave an account of his experiences and some of the historical background prior to their union with the United States. Pineapple was served as part of the refreshments.

Born: To Mr. and Mrs. Lewis Virgil Williamson of Dillon avenue, a boy, Vernon Keith, June 22 at O'Connor sanitarium.

Walters-Saveker Marriage Held At Methodist Church

The Campbell Methodist church was chosen by Miss Jessie Mae Walters and David Richard Saveker for their wedding last Thursday afternoon, at which the Rev. William H. Lloyd read the marriage rites.

The bride who wore a powder blue suit with navy accessories and an orchid corsage was given in marriage by her father, Howard Walters of Pismo Beach. Her bridesmaid, Miss Evelyn Falco, had chosen pale pink with navy accessories and a corsage of blue and yellow.

The groom's attendants, college friends, were Franklin Fuller, best man, and Carroll Bush, usher.

White flowers and tall white tapers with a background of redwood branches were used for decorations.

Playing the wedding music, Mrs. Homer De Witt Pugh also accompanied William R. Saveker, the groom's father who sang, "At Dawning" and "I Love You Truly."

The bride, whose home is in Pismo Beach, has been a student at San Jose State college for three years.

The groom graduated from the San Jose State junior college, and from the engineering department of Stanford with this year's class. Holding an ensign's commission in the naval reserve he expects a call to active service very soon.

The family and wedding party enjoyed a reception at the Saveker home on Topeka avenue in Burbank and then the young people left for a honeymoon in the redwood empire.

The groom's parents are well known in Campbell where Mrs. Saveker lived as a girl (nee Bernice Lloyd) and who has taught in the grammar school and now is instructor at the county pre-ventorium, and Mr. Saveker was a member of the Campbell Men's Glee club at one time.

St. Lucy's Club Holds Final Session of Season

The meeting of the St. Lucy's club of Campbell on June 19, the last for the summer, enjoyed a large and very successful attendance.

Mrs. Ralph Nelson, the outgoing treasurer was given a stork shower and received many lovely things.

Mr. and Mrs. David Rutherford of the Rutherford funeral home, entertained the group with music and singing.

Delicious refreshments were served.

The Drew Cannery began work on apricots this week bringing them from outside, and is running two four hour shifts. Local apricots are ripening rather slowly due to the cool cloudy weather.

\$47,500 CAMPBELL PHONE PROJECT STARTED MONDAY

Start of Campbell's \$47,500 project for a new telephone system was heralded this week as workmen broke ground for a new central office building to be erected on the west side of South Second street. The contract for the building construction is in the hands of Burr Matthews, Sunnyvale contractor.

According to H. V. Mann, manager of the Pacific Telephone and Telegraph company, the building will be a one-story structure of wood frame and stucco finish. It is expected to be completed in early fall.

Installation of the dial central office equipment and changing of customers' telephones to dial equipped instruments will begin as soon as the building is completed, preparatory to the cutover to the new system which is scheduled for early next year.

Mann stated that since a special telephone numbering system is required to operate with the dial central office apparatus, all present telephones in Campbell would be changed to a four-digit basis at the time of the inauguration of the new system.

"This project," said Mann, "is only a part of the gigantic construction program our company has under way on the Pacific coast to meet the accelerated tempo of the times. We telephone folk are in the vanguard of preparedness work through being called upon to plan service arrangements and install facilities as early steps in the building and expansion of military camps, industrial plants and housing projects. In addition to such undertakings, there is the daily matter of providing service for scores of communities which are humming under the impetus of the defense program."

"Here in Campbell the increase in the number of telephone users has required this project for a completely new system to keep pace with the growth of the community. To illustrate this gain during recent years: in 1938 there was a net increase of 36 telephones here; in 1939, 56 telephones and in 1940, 63 telephones. During the first five months of 1941 alone, we have gained 33 telephones, bringing the total number in service in this exchange to 647."

Mr. and Mrs. Ralph Horn are the happy parents of a daughter, Linda Carroll, born June 21 at Palo Alto hospital. Mr. Horn, a brother of Mrs. Worthin Grattan, has just received an appointment in the post office department in Los Angeles and has entered upon his duties. His mother is staying with his wife and will accompany her and the baby south when they are able to travel.

Max Watson Tells Kiwanians About Adult Probation

Max Watson gave a very interesting talk to the Kiwanis club Tuesday, his theme being "Adult Probation," with a few side lines. Chairman for the day was Martin Walsh.

Next week, by request, Walter Smily will complete his account of personal experiences in World War I and will be his own chairman.

At the recent Kiwanis International convention in Atlanta, Ga., awards were made in an individual achievement contest for best community service and welfare programs, in which Hollywood placed second.

The Kiwanis districts, combining all their hundreds of clubs, also received recognition for their total service programs. The winners are: Michigan, California-Nevada, Wisconsin-Upper Michigan, and Kentucky-Tennessee.

Elective Officers Of Ada Rebekahs To Be Installed

At the regular meeting of Ada Rebekah Lodge No. 223 of Campbell, on Tuesday evening, July 1, District Deputy President, Jeanette Rodoni and staff of Saratoga will install the elective officers of the local lodge.

The following officers are to take office for the next term:

Ellen Arnold, noble grand; Gertrude Cornell, vice grand; Lillian Ohlen, recording secretary; Ruth Payne, financial secretary; Zadie Rice, treasurer, Eva Bachman, trustee. Refreshments will be served and all Rebekahs are invited.

Margaret Keesling Sails For Islands

Miss Margaret Keesling, who is sailing today on the S. S. Lurline for Hawaii, has been the incentive for a number of "bon voyage" parties the past week.

The faculty of the Anne Darling school in San Jose, of which she is a member, feted her at a surprise luncheon. Members of her sorority, Sigma Tau Delta, held a barbecue-picnic in her honor and her mother, Mrs. Archie Keesling, presided over a dinner party for her. The Hawaiian idea was carried out in the arrangements and a shower of gifts was presented to Miss Keesling.

Accompanying her on this two month's vacation will be Miss Lola Johnson of Crockett. A large number of friends will be at the dock to bid the girls farewell when they sail today from San Francisco.

Gary Warren Weeks, little son of Mr. and Mrs. Frank Weeks seriously injured a finger in the vacuum cleaner a few days ago.

DR. W. R. MORGAN ARRANGES U. S. O. CAMPAIGN HERE

Dr. W. R. Morgan as president of the chamber of commerce has been appointed to arrange for collection of funds for the United Service Organizations campaign for money to provide recreation facilities for men in military service.

Depositories will be provided at the Farley Real Estate office and the Campbell Water company office. In case any individual cannot make a contribution in person or send it, a telephone call to the Water company will provide a messenger.

No definite quota has been set for Campbell but it has been suggested by state headquarters that the community try to raise \$250.

There have been several inquiries by our citizens about making contributions and some have already donated in San Jose, but every one should feel an interest in the youth of our land who have been taken out of their homes and normal life to prepare for our defense, and do something to help make "off time" a pleasure rather than a bore.

Funeral Rites for Infant Daughter Held Monday

Funeral services were held Monday afternoon from the Rutherford Funeral Home for Rose Marie Williams, the seven months old daughter of Mr. and Mrs. Otto Williams of Casey road who died Sunday at the county hospital.

Rev. D. H. Baldwin, the newly appointed minister of the Methodist church, conducted the service and David Rutherford sang "Lily of the Valley" and "Just As I Am," requests of the parents, with Mrs. Rutherford accompanying.

Interment was in Santa Clara City cemetery.

Farewell Party Given for Rev. and Mrs. Brunswick

The Kilkare Kupples Klub of the Methodist church gave a surprise farewell party for Rev. and Mrs. John Brunswick last Wednesday evening. The Brunswicks were being entertained at dinner at the home of Mr. and Mrs. O. Buck on Milton avenue. The Klub, thirty-six members strong, went to the Buck home at eight o'clock surprising the Brunswicks, then adjourned to the parlors of the church with the Brunswicks and Bucks for an enjoyable evening of games and refreshments. A parting gift was presented Rev. and Mrs. Brunswick who are leaving tomorrow for their new charge at Upper Lake.

GYPSY BLOOD

When you start to work these fine summer mornings, do you have trouble keeping your eyes off the distant horizon?

Do you feel the pull of the sun and the wind and the sky, drawing you away from workaday scenes and out toward the open road? Does lead crawl into your shoes as you near your job?

That's Gypsy blood, and it courses through just about everybody's veins along this time of every year. The doctor who so diagnoses the epidemic is Jerry Carpenter, the vacation expert of the state chamber of commerce. He knows all about where to go and why, and even how much it costs. For those who can't indulge in a regular vacation, his prescription is to treat the patient to a "bang-up celebration over the week-end" — and judging from the formula sheets prepared by his department there are such celebrations within a stone's throw of most every community in the state.

If Gypsy blood's giving you a bad time this season, consider Dr. Carpenter's advice and take a jaunt, short or long. The beauty of living in California is that you can get yourself a change of scene in a few hours travel — and a week-end trip goes a surprisingly long way toward curing your Gypsy blood. For a week, at least.

IS THIS TREASON?

Soon after United States troops had taken over at the plant of the North American Aviation company, William Pupis, one of the hot-headed strike leaders, defiantly exclaimed to reporters:

"If we had half the equipment that the boys with bayonets had, we could have given them cards and spades and all the argument they wanted."

Translated, that statement means that Mr. Pupis and his beef squad stopped short of fighting the United States Army only for lack of rifles and machine guns. In other days, such talk would have been called by its right name — incitement to insurrection. In the days of Abe Lincoln, it would have been called treason. Yet Mr. Pupis, so far as we can learn, is still at liberty; still claiming all the privileges of American citizenship.

We are glad to note, however, that the stern warning of Secretary of Navy Knox that subversive elements, whether in labor unions, or out, will be "proceeded against as enemies of the country." When an arrogant strike leader openly declares that he would take on the United States Army—if he had the guns to do so—it is high time, as Mr. Knox asserted, that "The challenge of subversive and Communist groups be accepted."

Reduces Vibration

That vibration is reduced more than 75 per cent is the claim of its inventor for a Diesel engine that exerts both upward and downward strokes simultaneously.

OUR STATE GOVERNMENT

GEORGE R. REILLY
STATE BOARD OF EQUALIZATION

(In a new series of articles on "Our State Government," Commissioner George R. Reilly, our member of the State Board of Equalization, plans a streamlined analysis of the most important departments of state government, and their functions. The series when complete will give a comprehensive and informative picture to our readers as to how state government in California works.)

—EDITOR

In the California Department of Ports and Harbors there are four bureaus, including the Boards of State Harbor Commissioners for San Francisco and San Diego. In addition the department's functions include control and supervision of pilots and port wardens.

The State Personnel Board was created in 1934 when the state approved its latest system of civil service and is charged with the administration of the present civil service system. The board consists of five members appointed by the Governor with the advice and consent of the Senate, for terms of ten years.

Following the depression of 1929 and 1930, California was faced with many prob-

lems concerning the public welfare and as a result new departments of state government were created. The State Relief Administration was created originally to meet what was considered a temporary emergency and to co-operate with national and local agencies engaged in the same work. Its functions, of course, were the relief of distress among those of our citizens unable to provide for their own welfare. With its many bureaus and divisions it operates an extensive program of public assistance. It is administered by a director appointed by the Governor. Acting director now is Ralph J. Wakefield.

This department is being discontinued and all its offices closed by July 1.

Forecast Rainfall

It is now possible to forecast rainfall eight months ahead, with only a 5 per cent leeway for inaccuracy if it is done in February. Such was the information given to the American Association for the Advancement of Science on the University of Washington campus. Prof. Fred Merryfield of Oregon State college has found that by measuring rainfall from September (beginning of the scientist's rainfall year) until February, and then comparing it with the compiled previous 40 years rainfall records, during this period, the rainfall for the rest of the year then can be forecast with reasonable accuracy. He has found that rain falls in the same proportion during the second period as in the first year after year.

Gifts for Motorists

An appropriate gift for the enthusiastic motorist might be a matching road map holder and motoring log. Of a convenient size and not bulky, they are bound in black morocco leather, hazel pigskin or, less expensive, in brown or red simulated leather.

Fishes Without Hook

A northern Indiana angler, J. W. Souder by name, reports he catches catfish without using a hook. He ties pieces of beef on a line, and when the fish grabs the meat, he deftly pulls it into the boat. According to Mr. Souder, you must not let the fish's tail touch anything or else it will let go. The reason for this does not seem to be clear, but maybe it's just a fish story.—From the National Wildlife Federation.

**RAILWAY
LABOR UNION DEMANDS
WOULD COST
900 Million Dollars
A YEAR**

THE labor unions have made their demands upon the railways of the United States—and through the railways upon the PUBLIC. These demands are vastly larger in proportion than any they have ever made. The economical and efficient operation of the railways is vital to the nation's defense effort. Therefore, the Western Railways present to the public the following facts:

The labor unions representing engineers, firemen, conductors, brakemen and switchmen are demanding a 30 per cent increase in wages, amounting to 190 million dollars a year—although their present rates of pay are the highest in history.

Other unions representing a greater number of railway employees are demanding wage increases ranging as high as 95 per cent—averaging 47 per cent—and amounting to 580 million dollars a year—although their present rates of pay also are the highest in history.

Thus the wage increases being demanded by the labor unions amount to 770 million dollars a year, an average increase in excess of 41 per cent.

In addition, certain of these labor unions have demanded advances in their pay not included in the above figures, and more rules for the creation of unnecessary jobs.

The situation, then, is this: The total cost of complying with all the demands made would be approximately 900 million dollars a year!

The average weekly earnings of railway employees are now 15 per cent higher than in the peak year 1929, while the cost of living is 12 per cent less.

The demands of the railway labor unions are being made when the entire nation has just been asked to make a supreme effort for National Defense.

The railways cannot meet these demands without a great increase in the cost of transportation. They exceed by more than 700 million dollars the income that the railways had left after paying their annual expenses, taxes and charges in 1940.

The railways have a vitally important job before them. They need all their resources to continue adequately to serve you and contribute effectively toward the National Defense Program.

THE WESTERN RAILWAYS

CHURCHES

Congregational Church Notes

J. H. Bennett, Pastor

This Sunday at 11 a. m. the Rev. J. H. Bennett will preach. Subject of his talk is "On the Top of the World." Talk to the children and choir music.

At 6:30 p. m. youth groups will meet.

Choir practice on Wednesday at 7:30 p. m. Singers are invited even if they are only staying in Campbell temporarily.

The general Sunday school held its quarterly party at Alum Rock Park last Thursday. Leader Miss Dorothy Merriman. This quarter the boys were the winners of the attendance record and the girls had the privilege of supplying the eats.

The Men's club is organizing a picnic for the men and ladies on Sunday, August 3, leaving Sunday after morning worship.

CHURCH UNION

The members of the Congregational church rejoice in another opportunity to join forces in worship with the Methodist church of Campbell this summer. July 6, 13, and 20 will be in the Congregational church when the Rev. J. H. Bennett will be in charge. August 17, 24, and 31 will be in the Methodist church when the Rev. D. H. Baldwin will be in charge. Rev. Baldwin is already known to Rev. Bennett and the Congregational church in Campbell stands ready to welcome him and cooperate in every way possible.

U.S. Is Using Many Foods In Duraglas

Development of Industry Has Far Reaching Effect On Housewife

Glassmaking, America's oldest industry and a craft with a 5,000-year-old tradition, is today making a dramatic entrance into the kitchen. Replacing the heavy, cumbersome glass containers of yesteryear, there now appear lightweight, more durable and economical receptacles made by a new scientific technique called duraglas.

Far-reaching in their range of food products, duraglas containers are already available for the packaging of coffee, fruits, vegetables, beverages and various other products. Even the familiar milk bottle now appears in containers made by this new technique.

Have Re-sealable Caps

One of the most popular of the new containers to be made available to housewives in quantities are duraglas, vacuum-packed coffee containers, fitted with re-sealable caps that help to keep your coffee fresher for longer periods.

Your milk bottle, manufactured to withstand more than 35 trips, is especially benefitted by the new glass technique, which has made the milk bottle five ounces lighter and even tougher than bottles of the old style.

Glass has long been established in the home as the most sanitary container for food and other necessities. From the baby's bottle to the prescription bottles in the medicine chest, mothers and wives have placed their confidence in the glass container.

Visibility Demanded

Today in the modern market, the housewife wants to see what she is buying, and thus quality has been enhanced by visibility.

The romance of glass is bound up with the history of ancient Egypt, Rome and Greece. Glassmaking was the first industry to be established in the United States, when a glass plant was established at Jamestown, Virginia, in 1607.

Today glass containers are manufactured so economically and on such a vast scale—more than seven billion went to market in the United States last year—that the housewife can now throw away her empties without a second thought.

Abbey's Park Theater

Abbey's Park theater in Madison Square was destroyed by fire on October 30, 1882. Lillie Langtry's opening night there had been arranged, but the fire necessitated her going to Wallack's theater instead, where she made her American debut in "An Unequal Match" on November 6, 1882.

Spinach Without Grit

Spinach without a trace of grit is possible, it is reported in Industrial and Engineering Chemistry, if a housewife will rinse it in a "molecularly dehydrated sodium phosphate glass."

all Churches of Christ, Scientist.

The subject of the Lesson-Sermon will be "Christian Science." Included among the Scriptural selection will be verses from John 14. A passage from the Christian Science textbook will also be included.

THE POCKETBOOK of KNOWLEDGE

All young men of Campbell district who have reached 21 years of age since the last registration for draftees or will attain their majority on or before Tuesday, July 1, must register, between the hours of 7 a. m. and 9 p. m.

The registration office will be at the Farley real estate office, corner of Campbell and Central avenues, with G. E. Farley, chief registrar, assisted by Richard W. Morton, and Ralph H. Hyde.

Miss Billie Sterritt who announced her engagement to Floyd G. Blakely last Christmas was honor guest at a dinner at the Hawaiian Gardens, given by Miss Eva Seko of Los Gatos at which she announced her own engagement.

Husband, 100, Sues Amor Charles, 100 years old, of Ada, Okla., has filed suit for divorce and says he plans to marry again. His petition charges his wife, Charity, 80, abandoned him three years ago.

OUR HIGH SCHOOL

The booklet "Things Worth Knowing About Your School" was compiled for Public Schools Week, and the following articles are taken from it. —Editor.

COMMERCE DEPT.

Miss Dorothy Curry - Mrs. Anna Dart - Miss Gladys Hall

At first, commercial education in the secondary schools had only vocational objectives. Today, the vocational objectives have been replaced and enriched by the addition of social, citizenship, and personal use objectives which more fully meet the individual needs and abilities of the students.

Business education is both vocational education and general education. As vocational education it helps prepare the individual for job efficiency. As general education it prepares the individual to meet more effectively the problems in the business of living.

The aims of commercial education are to give students sufficient business information as is necessary for daily activities; to discover the aptitudes and abilities that help may be given students in planning their school programs and in selecting their vocations; to develop certain qualities—tolerance, cooperation, adaptability, and good will; to develop the technical skill necessary for beginning employment; to provide the courses of training which more adequately meet individual needs and the employment opportunities of the community.

Thus, we do not give intensive training in any specific operation peculiar to a particular type of business. The function of the department is chiefly to provide a general knowledge and background with sufficient skill training to enable the student to gain initial placement.

Freezing Fruit

Freezing eliminates the losses from spoilage unavoidable in marketing fresh fruit and vegetables. Only the edible parts go to market, and farmers make use of trimmings, pods, husks and other kitchen wastes either for stock food or fertilizer. There is also a saving in transportation cost of inedible parts, it is pointed out.

Meat Refrigeration

Proper storage of meat is as important as correct cooking methods. It should neither be left in the wrapping paper nor washed with water. Simply wipe off with a clean cloth, cover with waxed paper and store in the meat compartment of the refrigerator.

"Pirate Ensemble" of the Ice Follies of 1941, now at Winterland, San Francisco

Special Matinee Of Ice Follies To Be Held July 12

First daytime performance of the spectacular new Ice Follies of 1941, now playing nightly at Winterland in San Francisco, will be held Saturday afternoon, July 12, it was announced this week.

The special matinee was set in response to thousands of requests, a large part of which came from those planning to visit San Francisco over the holiday week-end.

The same great cast of stars and the same sparkling ensembles which appear nightly in the new Ice Follies will be on the program for the matinee, which is the only daytime show now scheduled by the dazzling revue.

International skating stars featured in "the world's greatest musical revue on ice," will all be on hand for the matinee, it was declared by the management. They include Evelyn Chandler, Eddie Shipstad, Oscar Johnson and Roy Shipstad, producer-stars; Bess Ehrhardt, Bruce

FEEN-A-MINT URGENT!

message to you who suffer periodic
FEMALE PAIN
and
"WEAKNESS"

READ EVERY WORD! You women by nature often have delicate constitutions and because of this often suffer monthly pain and distress. Maybe you've noticed YOURSELF getting cranky, mildly depressed, nervous at such times? Then try Lydia E. Pinkham's Vegetable Compound—famous for over half a century in helping calm women's upset nerves, relieve monthly pain (cramps, headache, backache), weakness and dizziness—due to monthly functional disturbances. Pinkham's Compound—made especially for women—has helped hundreds of thousands of women and girls build up resistance against distress of "difficult days." Telephone your druggist right now for a bottle of Lydia Pinkham's Compound. WORTH TRYING!

Mapes, Frances Claudet, Osborne Colson, Frick and Frack, the Galbraith and McKellan brothers, Papez and Zwack, the thirty-six dazzling "Ice Follies" and many others.

The San Francisco engagement of the Ice Follies is setting new attendance records each week.

This year's Ice Follies is a completely different version of the famous entertainment which thrilled three-quarters of a million persons in the bay area in 1939-40. Adding to the beauty of the presentation is the remodeled interior has a 117-foot stage and a of Winterland, which now new balcony.

Mrs. Jessie Campbell was home from Capitola the first part of the week for a few days. She was feeling very much improved from her stay, having been ill for some time prior to going over.

The board of directors of the Santa Clara County Tuberculosis association have named Robert B. Kennedy president to take the place of Dr. Earl O. G. Schmitt who has resigned because of illness. At the same time, Dr. Merlin T. Maynard was named vice-president.

ARE YOUR ELECTRIC APPLIANCES DOPEY AND UNDERNOURISHED?

Look at what happens when you put too many appliances to work on a wiring circuit. The toaster or other appliances are dopey or slow in action. Bread for example gets toasted in eight minutes instead of five or six. That means appliances are not getting the full voltage and slow down when circuits are overloaded.

When a qualified electric contractor for a home he is thinking of your convenient and economic use of electricity now and in the future. Good adequate wiring costs little more than "skimping" or cheap wiring and it soon pays for itself many times over.
